Security Preparedness Bulletin

SCOPE

The Chicago Police Department has compiled the following options for consideration to assist the City of Chicago's private sector in creating a safe and secure environment. Given the nature of mass gatherings, predicting who will attend and what their motivations will be is difficult and unreliable. It is possible that individuals unassociated with the group will imbed themselves to exploit the group's emotions and/or to incite and/or conduct acts of violence.

OPTIONS FOR CONSIDERATION

- Secure items that can be easily used to cause damage such as construction materials, outdoor seating, tables, garbage containers, etc.
- Have security conduct outside sweeps and look in areas where items could be secreted such as in planters, bushes, and dumpsters. If anything is found of a suspicious nature, immediately report it by calling 911.
- Check exterior doors to ensure they are operating / locking as designed and expected.
- Identify alternate egress and ingress for building occupants and first responders. If main entrance is not accessible and first responders have been requested, ensure that alternate access location is communicated via 911 and if safe to do so, have someone positioned to guide first responders to area of needed assistance.
- Identify alternate vehicular and pedestrian pathways in the event of roadway or sidewalk impediments.
- In the event of criminal behavior, utilize CCTV systems to capture relevant behavior and secure it for follow-up investigation.
- Review existing security plans and procedures to ensure they address issues such as shelter in place and/or lock-down procedures.
- If any information is identified that could impact public safety, contact 911 immediately.

If You See Something....Say Something
CALL 911 IMMEDIATELY
